PROFESSIONAL SUMMARY

Results-driven Software Engineer with 8+ years of experience designing, building, and scaling distributed backend systems and cloud infrastructure across fintech, analytics, and SaaS environments. Proven track record of leading cross-functional engineering teams, reducing system latency by over 40%, and delivering high-availability platforms serving millions of users worldwide. Skilled at translating ambiguous business requirements into well-architected, maintainable technical solutions, and at building engineering cultures rooted in code quality, automation, and continuous improvement. Passionate about mentoring engineers, driving cross-team collaboration, and staying ahead of emerging technologies in cloud-native architecture, distributed systems, and developer experience tooling. Recognized by peers and leadership for calm, methodical incident response and for turning complex technical tradeoffs into clear decisions for stakeholders at every level of the organization.

WORK EXPERIENCE

Senior Software Engineer — NimbusCloud Technologies

Jan 2021 – Present

- Led a team of 6 engineers to redesign the core payments microservice, cutting transaction latency by 42% and saving an estimated \$1.2M annually in infrastructure costs.
- Architected a multi-region Kubernetes deployment strategy spanning 3 AWS regions, improving platform uptime to 99.98% and enabling zero-downtime failover.
- Mentored 4 junior engineers through structured code reviews, pairing sessions, and a quarterly internal tech-talk series, with 2 promoted to mid-level roles within 18 months.
- Introduced CI/CD pipelines using GitHub Actions and ArgoCD, reducing release cycle time from 2 weeks to 2 days and increasing deployment frequency by 5x.
- Partnered with Product and Security teams to design a PCI-DSS compliant tokenization service, passing external audit with zero critical findings.
- Drove adoption of OpenTelemetry-based distributed tracing across 25+ microservices, cutting mean time-to-resolution (MTTR) for production incidents by 35%.
- Presented architectural decisions and roadmap updates to VP-level stakeholders on a quarterly basis.

Software Engineer II — BrightPath Data Systems

Jun 2018 – Dec 2020

- Built RESTful APIs and event-driven services in Python and Go supporting 2M+ daily active users across web and mobile platforms.
- Migrated legacy monolith to a microservices architecture using Docker and RabbitMQ, reducing average deployment time by 60%.
- Collaborated with product and design teams to ship 15+ customer-facing features, including a real-time notification system and an in-app analytics dashboard.

- Designed and implemented a caching layer using Redis that reduced average API response time from 480ms to 120ms.
- Authored internal documentation and onboarding guides that cut new-engineer ramp-up time from 6 weeks to 3 weeks.
- On-call rotation lead for 2 years, maintaining a 98% SLA compliance rate across all monitored services.

Software Engineer — Lakeview Analytics

Aug 2016 – May 2018

- Developed ETL pipelines processing over 500GB of data daily using Apache Spark and Airflow for downstream business intelligence reporting.
- Implemented an automated testing suite using pytest and Selenium, increasing code coverage from 54% to 88% and reducing regression bugs by 45%.
- Built internal dashboards using Tableau and custom Python scripts to track key data-pipeline health metrics for leadership.
- Optimized SQL queries against a multi-terabyte PostgreSQL warehouse, reducing average report generation time by 70%.

Junior Software Developer (Co-op) — Horizon Tech Solutions

Jan 2015 – Jul 2016

- Assisted in developing internal tooling for inventory tracking using Java and MySQL, used daily by a 40-person operations team.
- Wrote unit and integration tests for legacy codebase, raising overall test coverage by 20 percentage points.
- Participated in Agile sprint planning, retrospectives, and daily stand-ups as part of a 5-person scrum team.

EDUCATION

Degree	Institution	Year
M.S. in Computer Science	University of Texas at Austin	2016
B.S. in Computer Engineering	Texas A&M University	2014

TECHNICAL SKILLS

Category	Skills
Languages	Python, Go, Java, JavaScript, SQL
Frameworks	Django, FastAPI, React, Spring Boot
Cloud & DevOps	AWS, GCP, Docker, Kubernetes, Terraform
Databases	PostgreSQL, MongoDB, Redis, Elasticsearch
Tools	Git, Jenkins, GitHub Actions, Jira, Grafana

CERTIFICATIONS

Certification	Issuer	Year
AWS Certified Solutions Architect – Professional	Amazon Web Services	2023
Certified Kubernetes Administrator (CKA)	Cloud Native Computing Foundation	2022
Project Management Professional (PMP)	PMI	2020

KEY PROJECTS

Real-Time Fraud Detection Engine — Built a streaming pipeline using Kafka and Flink to detect fraudulent transactions within 200ms, reducing fraud losses by 30%.

Internal Developer Platform — Designed a self-service platform enabling teams to provision infrastructure via Terraform modules, cutting provisioning time from days to minutes.

LANGUAGES

English	Native
Spanish	Professional
French	Conversational

SKILL PROFICIENCY

Skill	Proficiency	Years
Python	Expert	8
Go	Advanced	5
Kubernetes	Advanced	5
AWS	Expert	7
React	Intermediate	3
Terraform	Advanced	4
PostgreSQL	Advanced	7

ADDITIONAL PROJECTS

Distributed Rate Limiter Library — Open-source Go library implementing token-bucket and sliding-window rate limiting for microservices, adopted by 3 internal teams and 200+ GitHub stars.

Cost Optimization Dashboard — Internal tool aggregating AWS Cost Explorer data into a live dashboard, helping engineering leadership identify \$300K in annual savings opportunities.

Chatbot-Assisted Incident Runbook — Slack-integrated bot that surfaces relevant runbooks and past incident resolutions during on-call escalations, cutting initial triage time by 25%.

Open Source Contributions — Active contributor to the FastAPI and Terraform AWS provider repositories, with 30+ merged pull requests addressing bugs and documentation gaps.

AWARDS & RECOGNITION

Award	Organization	Year
Engineering Excellence Award	NimbusCloud Technologies	2023
Spot Bonus — Payments Platform Launch	NimbusCloud Technologies	2022
Hackathon Winner — Internal Innovation Day	BrightPath Data Systems	2019
Dean's List (4 semesters)	University of Texas at Austin	2015–2016

PUBLICATIONS & TALKS

- "Scaling Payments Infrastructure for High-Throughput Systems" — Guest talk at AustinDevOps Meetup, 2023.
- "Practical Distributed Tracing with OpenTelemetry" — Conference talk at Cloud Native Summit, 2022.
- Co-author, "Patterns for Resilient Microservices," internal engineering blog series, BrightPath Data Systems, 2020.

VOLUNTEER EXPERIENCE

Volunteer Mentor — CodePath.org

Sep 2020 – Present

- Mentor first-generation college students learning full-stack web development through weekly 1:1 sessions.
- Reviewed 50+ student capstone projects, providing feedback on architecture and code quality.

Workshop Volunteer — Austin Tech Alliance

Mar 2019 – Dec 2021

- Co-organized beginner-friendly coding workshops for underrepresented groups in tech, reaching 300+ attendees.

PROFESSIONAL DEVELOPMENT

Course / Program	Provider	Year
Advanced Distributed Systems	Coursera (University of Illinois)	2021
Leadership for Engineering Managers	Internal NimbusCloud Academy	2022

Deep Learning Specialization	DeepLearning.AI	2019
------------------------------	-----------------	------

INTERESTS

Rock climbing, woodworking, amateur astronomy, contributing to open-source developer tools, and writing a personal blog on distributed systems and engineering leadership.
